# :OMPROMISE

**Business Email Compromise (BEC)** is a cyberattack where attackers impersonate trusted individuals or organizations through emails to deceive victims into taking actions, such as transferring funds or sharing sensitive information.

### RECOGNIZING A BEC ATTACK

Poor spelling, grammar and punctuation

> BEC attempts often contain errors in language usage.

Unusual formatting, appearance or domain

> Be cautious of messages that look different from the sender's typical style or come from random domains.

Non-official email address

Messages not originating from official email addresses or domains may indicate a BEC attack.

Improper greeting or signature

> Unusual greetings, signatures or contact information could suggest phishing attempts and BEC attacks.

**Unusual fund requests** 

Payment requests to uncommon addresses through unusual methods should be treated cautiously.

## ACT NOW TO PROTECT YOUR INBOX

We help you combat advanced cyberattacks with ongoing awareness training.

### **Email-only** communication

If the sender avoids other channels of communication, it's suspicious.

#### **Urgency & rushed** transactions

BEC attackers create a sense of urgency to manipulate victims into acting hastily.
